SUMMARY

What is life about if you can't reinvent yourself? After several years of working as a landscape architect I felt my career prospects beginning to stagnate. My ability to find new employment began to narrow as firms increasingly closed their doors I had to make a choice to persevere on my current path or pivot and learn new in demand skills.

In 2013 I finally took a leap of faith and joined Startup Institute's program for Product Design, which helped me develop the skills to gain a position as a User Interface Designer. My goal is to be a part of a design-focused team in Austin TX creating cutting edge work that solve problems and provide the best possible experience.

WORK HISTORY
